PUBLIC NOTICE

Date of Release: 10-28-26 **PWS Number:** WY5601069

FAILURE TO MONITOR VIOLATION
TOTAL COLIFORM BACTERIA

To All Glenrock South Recreation Complex Water Users
(Name of water system/business)

We are required to monitor your drinking water for total coliform bacteria on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During Sept. 2026 *(compliance period) we did not complete all monitoring for total coliform bacteria and therefore cannot be sure of the quality of our drinking water during that time.*

The table below lists the failure to monitor violations we received for total coliform monitoring during the last year. *(Please check the ones that apply to your system.)*

Monitoring Period (Month/Year)	Failure to Monitor	No Replacement Sample after a Routine Sample was Invalidated by the Lab	Insufficient Number of Routine Samples
September 2026	BacT		1

What happened? What is being done?
The was taken in Sept. but mislabeled on Document as Special instead of Routine, causing this violation. The Sept mislabeled sample was found to be absent of BacT. The Oct. sample was taken and found to be absent of BacT. All samples found to be Safe.

If you have any questions, please contact John Funk *(Water system contact person)* at (307) 259-0945. *(Phone)*

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

Optional: If applicable, you may also include the statement that "Subsequent water samples have been analyzed as safe."

SAMPLE: Suggested public notice language for FAILURE TO MONITOR FOR TOTAL COLIFORM.
You may use the above notice sample or write your own but the text in talics must be included in any notification.
